

# **NOTICE**

The Route 28 Corridor Improvements Project Team is pleased to announce that the

## **McLEAREN ROAD INTERCHANGE at ROUTE 28**

is

## **OPENING TO TRAFFIC**

on

**WEDNESDAY, MAY 3<sup>RD</sup>, 2006**

Beginning Wednesday, May 3rd after the morning rush hour, crews will begin switching McLearen Road traffic to the new bridge over Route 28. The existing signal at Route 28 and McLearen will be shut off at that time. All ramps will be open on the interchange with the exception of one ramp (Westbound McLearen Road traffic to Northbound Route 28), which cannot be completed until after traffic is switched to the bridge.

A **DETOUR** will be in place while this remaining ramp construction is completed. The Detour is shown on the attached map and is as follows:

### **\*No access to Northbound Route 28 from Westbound McLearen Road**

There are two (2) options for the access to northbound Route 28:

- Follow McLearen Road east, turn left onto Centreville Road, turn left onto Frying Pan Road, turn right onto northbound Route 28.
- Follow McLearen Road west across new bridge over Route 28 to Route 28 southbound. Exit at Air & Space Museum Parkway (east), exit onto northbound Route 28.

As soon as traffic is switched, construction crews will begin utility work under the existing roadway and then complete final construction of the ramp. The new ramp construction is anticipated to be completed and open to traffic the week of June 18, 2006, weather permitting.

For more information on the project, please see our website at [www.28freeway.com](http://www.28freeway.com).

On behalf of the Project Team, we appreciate your patience over the past year and look forward to a major improvement in traffic congestion and public safety once the interchange is open
